Dynamic Medical Expands in Western U.S.

LOS ANGELES--Rehab, respiratory and wound-care provider Dynamic Medical Systems has completed a \$3 million expansion, opening nine branches during the last six months. "This expansion allows us to grow by almost 50 percent in a short period of time, and matches our business model of reaching out into prime markets," said Dave Robertson, president and CEO. He added that the company, founded in 1995, has experienced cumulative growth of more than 600 percent over the past 10 years.

The new branches, which company officials hope will generate about \$5 million annually, are in Wyoming, Colorado, Idaho, Arizona, Nevada, Utah, Oregon, Washington and Montana. The company said it has secured more than 120 new accounts through the expansion thus far.
